Greek/Latin: Prefixes and Suffixes

Mission: Since 90% of the words we use have derived from Greek/Latin prefixes and suffixes, it makes sense to study and know these prefixes and suffixes because:

- a. then we can break down words that we do not know (while reading, SAT testing, etc.) and we will have a clue to their meaning.
- b. our scores on standardized testing will hopefully go up because we will not be afraid of words we do not know and because we will simply know more words.

We will study 8 weeks of Greek/Latin prefixes and suffixes. Here is how:

- 1. Take each prefix/suffix and brainstorm words you already know.
- 2. Look in the dictionary. Go down through the different meanings until you find the GK (or G) Lat. (or L) meaning. Make sure that the meaning you find comes up in more than one word. We are looking for shortcuts here, but this is not a fill-in-the-blank exercise. You have to think about it. (Suffixes are a little harder because they come at the end of the word, and you have to think about it a little more.)
- 3. In your Greek/Latin notebook/ section of your binder, write the prefix or suffix, write the definition which comes up most often, and write at least three words (and a brief definition of the example word. Be able to explain it in your own words).

Example:

hemo, hema= blood

hemoglobin=a red protein responsible for transporting oxygen in the blood of vertebrates. hemophiliac= A person who has a disorder in which blood does not clot.

hematologist--This type of doctor specializes in conditions of the blood and immune system.

You will be given a test after each week of Greek and Latin. I will conduct homework checks on the first set of dates and the quiz will be on the second set of dates listed on the table below. There will be a test on all weeks on the final exam. Due dates for the written assignments and quizzes are listed below. Mark these on a calendar.
